Art Unit: 3724

1. This is a response to the amendment filed on 10/29/04. Applicant elected on 07/14/03 Group I and Species III in response to the restriction requirement mailed on 07/07/03. Applicant also indicated that claims 14-25 correspond to the elected Group I and Species III. However, in response to the objection to the specification under 37 CFR 1.71 and rejection of claims 17 and 24 under 35 U.S.C. 112, first paragraph, of the Office action mailed on 04/27/04, applicant has stated that the sheet of material can be cut optionally either with the transfer blade, the nip rollers, or the combination of the transfer blade and nip rollers. It appears that these three ways of cutting the sheet of material, which constitute three different species, have been claimed in claims 15, 17, 19, and 24. As stated in the rejection of claims 14 and 17 under 35 U.S.C. 112, first paragraph, two or more cutting devices cannot perform a cut on the web at the same time. In another words the nip rollers cannot function as tension rollers and as a cutting device at the same time. It appears that claims 14-25 set forth three different ways to cut the sheet of material. However, the cutting apparatus cannot perform the three different ways to cut the sheet material at the same time. Each apparatus or species of the instant invention has only a single cutter for cutting the sheet of material. Therefore, applicant has to elect a single cutting mechanism or elect one of the different species claimed in claims 14-25 and set forth below in order to comply with U.S.C. 112, first paragraph, set forth in Office action mailed on 04/27/04.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I. Apparatus in claims 14-25 having the nip rollers as the only cutting device to

Art Unit: 3724

brake or cut the sheet material;

Species II. Apparatus in claims 14-25 having the transfer blade as the cutting device and the nip rollers as rollers for creating tension when the sheet is contacted with the transfer blade; and

Species III. Apparatus in claims 14-25 having the transfer blade as the only cutting device for cutting the sheet of material.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the

Art Unit: 3724

evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ghassem Alie whose telephone number is (703) 305-4981. The examiner can normally be reached on Mon-Fri 8:30 am - 5:00 pm.
